Executive Summary

The Kindergarten Immunization Compliance Assessment (i.e., Kindergarten Assessment) is an annual assessment completed by the Tennessee Department of Health's (TDH) Vaccine-Preventable Diseases and Immunization Program (VPDIP) in collaboration with the Tennessee Department of Education (TDOE) and Tennessee (TN) public and private schools.

The goal of the assessment is to evaluate immunization coverage and exemption levels of state-required vaccines among children entering kindergarten. Children entering kindergarten in TN must be up to date with the following vaccines at the time of enrollment:

- **Diphtheria-Tetanus-Pertussis vaccine (DTaP)**¹
- **Hepatitis A Virus vaccine (HAV)**²
- **Poliomyelitis vaccine (IPV or OPV)**
- **Measles, Mumps, Rubella vaccine (MMR)**
- **Hepatitis B Virus vaccine (HBV)**
- **Varicella (chickenpox) vaccine/credible history of disease**

All required immunizations must be documented on the Tennessee Official Immunization Certificate or a valid U.S. military immunization record.³ Immunizing providers are also strongly encouraged to record immunizations in the Tennessee Immunization Information System (TennIIS). The state recognizes five different types of immunization certificates and exemptions:

Complete: All vaccination requirements completed according to the CDC immunization schedule.

Temporary: A temporary immunization certificate is issued when a child has not received all required vaccines but is in the process of completing them. A temporary certificate expires one month after the date that the next required immunization is due, according to the minimum acceptable ("catch-up") dose interval per the CDC/ACIP schedule.⁴ An expired temporary immunization certificate is not valid proof of immunization. Regardless of expiration status, students with a temporary certificate are classified as having an incomplete vaccine record.

Transfer: Child has recently transferred from out-of-state and is in the process of obtaining the Tennessee Official Immunization Certificate.

Religious Exemption: This exemption requires a signed statement by the parent/guardian that vaccination conflicts with their religious tenets or practices. If the child needs documentation of a health examination for the school, the claimed religious exemption must be noted by the healthcare provider on the immunization certificate.

Medical Exemption: Physician (MD, DO) or department Public Health Nurses are authorized to indicate specific vaccines medically exempted (because of risk of harm), preferably on the TDH medical exemption form attached to the Immunization Certificate. Other vaccines remain required. The medical reason for the exemption does not need to be provided.

Children who have incomplete or missing documentation of childhood immunizations are not permitted to attend public school per Department of Education statute, T.C.A. § 49-6-5001.

Public Chapter 169 Senate Bill No. 386 allows valid military immunization records to be submitted for school entry. Immunization requirements are the same for these military records and students should be reported in the category that represents their immunization status.

¹ Diphtheria-Tetanus toxoid vaccine (DT), if medically indicated

Assessment Process

Tennessee uses a census-based approach to collect immunization data for the Kindergarten Assessment. All public schools with kindergarten students enrolled at the time of the assessment are asked to report results, except for public schools where the students must be tested to determine grade level and programs that are distance learning only. Additionally, all TDOE-accredited private schools in Categories 1, 1-SP, 2, and 3 that have kindergarten students enrolled at the time of the assessment are asked to report results. For a description of private school categories please visit <https://www.tn.gov/education/school-options/non-public-schools/non-public-school-categories.html>. School nurses and/or other trained school personnel review students' immunization certificates and report aggregate, de-identified data to VPDIP for each school year. Statewide results are published on the TDH website⁵, shared with TDOE and school districts, and published on the CDC SchoolVaxView website⁶. Kindergarten Assessment data for multiple years can be found on the new [TDH Immunization Coverage Rate Dashboard](#) website and can be used to draw comparisons against national objectives and evaluate trends over time.

2022-2023 School Year Statewide Summary

Statewide, 93.3% of all kindergarten students were fully immunized for all required vaccine series at the time of survey completion. Of the students who were not fully immunized, 2% had a temporary immunization certificate on file, 3% had a religious exemption on file, 0.2% of students had a medical exemption on file, 1.1% had an incomplete immunization record, and 0.4% were missing state required immunization records. The 2022-2023 Kindergarten Assessment found a second straight year of decline in immunization coverage with 0.4% of kindergartners missing required immunizations or proper documentation. Although the overall immunization coverage is good, an increasingly under vaccinated kindergarten community is at risk for highly infectious and sometimes fatal outbreaks of vaccine preventable diseases.

If a student had a valid temporary certificate, a medical exemption, or an incomplete immunization record, schools were asked to report which individual vaccine series the student had completed. **Figure 1** shows the percentage of public and private school students who were complete for each vaccine series compared to the national Healthy People 2020 goals. Note: The percentages in **Figure 1** reflect the sum of both public and private school kindergarten students who were complete for an individual vaccine series, regardless of whether they had received all the vaccines required for school enrollment.

⁶ <https://www.tn.gov/health/ceds-weeklyreports.html>

⁷ <https://www.cdc.gov/vaccines/imz-managers/coverage/schoolvaxview/data-reports/coverage-trend/index.html>

Figure 1. Percentage of **public and private school** kindergarten students who were complete for each vaccine series, compared to the Statewide Goal of 95%. Gray colored bar indicates less than 95% coverage.

Public Schools Statewide Summary

Of the 1,049 public schools that were asked to complete the 2022-2023 Kindergarten Assessment 1,008 (96%) submitted results. Statewide, 93.5% of public-school students were fully immunized at the time of the survey (69,719 of 74,595 students). Students who were not fully immunized fell into the following categories, in decreasing order of prevalence (Note: arrows and corresponding figures represent the percent change greater than 0.1% between 2021-2022 and 2022-2023 assessments):

- Religious Exemption: 2.9% (n=2,154) ↑ 0.7%
- Temporary Certificate: 2.1% (n=1,542) ↑ 0.1%
- Incomplete Record: 1.0% (n=777) ↓ 0.2%
- Missing Record: 0.3% (n=231) ↓ 0.2%
- Medical Exemption: 0.1% (n=107) ↔
- Transfer <30 days: 0.1% (n=65) ↔

Private Schools Statewide Summary

Although our response rate remains relatively stable among private schools, we continue to see a shift towards private schools with an all-time high of 6.4% of all kindergarten enrollment reported in the 2022-2023 Kindergarten Immunization Compliance Assessment. A total of 195 private schools (out of 268 schools; 73%) with kindergarten enrollment completed the 2022-2023 Kindergarten Assessment. Statewide, the survey response rate for private schools increased by 9%. Of those students, only 91.1% (4,644 of 5,097 students) were fully immunized, which represents a 1.7% increase in the fully immunized rate when compared to last year. Unlike the public-school Kindergarten Assessment, the private school survey lacks a central source of enrollment data and thus we are not able to ascertain how many private school students had immunization certificates that

were validated by TennHS. Students who were not fully immunized fell into the following categories, in decreasing order of prevalence (Note: arrows and corresponding figures represent the percent change greater than 0.1% between 2021-2022 and 2022-2023 assessments):

- Religious Exemption: 5.0% (n=253) ↑ 2.8%
- Incomplete Record: 1.6% (n=83) ↓ 1.6%
- Missing Record: 1.1% (n=107) ↓ 1.4%
- Temporary Certificate: 0.9% (n=44) ↑ 0.5%
- Medical Exemption: 0.3% (n=15) ↔
- Transfer <30 days: N/A for private schools based on data collection methods

Trends over Time

In 2022-2023, there was an increase in overall kindergarten assessment enrollment by 0.7% to 79,692. This continues the trend from 2021-2022, where enrollment grew by 7.2% to 79,120 kindergarten students compared with 2020-2021 which saw a 10% decline in overall enrollment during COVID-19. As mentioned, approximately 6.4% of the kindergarten assessment enrollment in this report are from private schools compared to 5.4% in 2021-2022. Since 2015, the percentage of public and private school students who received all vaccines per Tennessee's state requirements for kindergarten entry (i.e., were "fully immunized") has consistently been close to 95%. In recent years (see **Figure 2**) an all-time low of 93.5% of 2022-2023 reported public school kindergarten students were reported as being fully immunized. For a community to remain at low-risk for a highly infectious vaccine-preventable disease outbreak such as measles, this should be above 95%.⁷ With fewer fully immunized kindergarteners statewide, many counties fail to meet the minimum threshold for vaccine-preventable disease immunity. In 2021-2022, the number of counties that met the minimum 95% fully immunized threshold decreased from 72 (approximately 76% of all counties) to 43 (45%) counties in just two years. This trend continued with a sharp decline in 2022-2023 with only 26 counties (27%) meeting this 95% threshold.

During 2022-2023 increased religious exemptions for both public and participating private schools by 0.7% and 2.8% respectively (see **Figure 3**) were described. This continues the upward trend in religious exemptions since 2018, with 2022-2023 being an all-time high with 3% of all kindergarten students have religious exemptions, statewide. In 2022-2023, temporary certificates increased by 0.1% while incomplete records decreased by 0.2%. Medical exemptions increased by 0.1%. These data are concerning for a higher number of children without required immunizations at kindergarten enrollment. An increasing number of kindergarteners who are not fully immunized puts Tennessee schools and communities at risk for vaccine-preventable disease outbreaks and deaths.

Impact of COVID Pandemic

National estimates have shown a decline in overall vaccination rates following the United States declaration of a national state of emergency due to the SARS-CoV-2 pandemic. This analysis and report describe the impact of the pandemic upon childhood immunization rates in Tennessee. Since pandemic restrictions have been lifted, overall kindergarten survey enrollment increased in 2021-2022 and 2022-2023 school years. After the pandemic started, the number of counties with public school students meeting the 95% fully immunized threshold declined with only 45% (43 of 95) meeting the minimum for vaccine-preventable disease immunization. In 2022-2023, we recorded further decline to 27% (26 of 95) of counties meeting the 95% fully immunized threshold. Of the 34 counties with private school responses to the 2021-2022 survey, only 29% (10) exceed 95% of students

⁸ <https://globalhealthnow.org/2019-12/myth-about-herd-immunity>

fully immunized. For private schools, we saw an increase from 89.4% of students fully immunized to 91.1% which represents a contrast to decreases in vaccination coverage overall. Since the onset of the pandemic, we have observed a decline overall in fully immunized kindergarten students in Tennessee. This decline contrasts with an increase in children who are fully immunized by their 2nd birthday observed in the most recent [Immunization Status Survey Of 24-Month-Old Children in Tennessee](#). Actions to increase compliance with recommended childhood immunizations is needed to decrease the risk of future vaccine-preventable disease outbreaks.

Figure 2. Percentage of **public-school** students fully immunized, 2018-2022

The percentage of all TN kindergarten students who were not fully immunized, by category, over time, are shown in **Figure 3**. The SARS-CoV-2 pandemic resulted in barriers to obtaining immunizations as well as administrative challenges in the schools responsible for enforcing the state's immunization requirements. This resulted in an increase in incomplete immunization records in contrast to previous years (see **Figure 3, gold line**). The trend reversed in 2022-2023 with a decrease of 0.02%. In 2021-22 and 2022-23 school years, temporary certificates (see **Figure 3, blue line**) returned to pre-pandemic levels. The percentage of students claiming a religious exemption increased from 2.3% to 3.0% in 2022-2023 (see **Figure 3, red line**). This year represents the single largest annual increase of 0.7% resulting in a record high number of religious exemptions. The percentage of kindergarten students claiming medical exemptions from a vaccine rose slightly by 0.1% (see **Figure 3, grey line**). The percentage of missing records decreased by 0.2% to 0.4% (not shown in figure). The number of students who lack complete immunization records required for enrollment (incomplete certificate, medical exemption, religious exemption, temporary certificate, missing record) has reached an all-time high of 6.7% allowing for only 93.3% with a complete immunization on record for enrollment. The increases in

temporary certificates and religious exemptions represent the largest contributors. This leaves the community with high vulnerability for vaccine-preventable disease outbreaks.

- Religious Exemption: 3.0%
- Incomplete Record: 1.1%
- Missing Record (not shown): 0.4%
- Temporary Certificate: 2.0%
- Medical Exemption: 0.2%

Figure 3. Percentage of all TN kindergarten students not fully immunized, by category, 2018-2022

For Tennessee to reduce the risk of vaccine-preventable disease outbreaks, awareness and action are needed to increase childhood immunization. These efforts are critical to ensuring safe environments in schools. Medical providers who deliver health care to children are encouraged to review immunization records and provide catch-up immunizations at every opportunity. Thank you for partnering to protect public health in Tennessee.

Questions and comments regarding this report or the Kindergarten Assessment may be directed to School.Imm@tn.gov.

2022-2023 Kindergarten Immunization Compliance Assessment Results

Public Health Regions Summary

The percentage of public-school students fully immunized across Tennessee's public health regions ranged from 90.4% to 95.3%, with Chattanooga/Hamilton Region having the lowest percentage of fully immunized students and Sullivan Region having the highest percentage of fully immunized students during the 2022-2023 school year (see **Figure 4**). **Figure 5** shows the percentage of public-school students who had a temporary certificate, a religious exemption, an incomplete record, or had a medical exemption, across Tennessee's public health regions.

Figure 4. Percentage of **public-school** students fully immunized, the number of **public-school** students fully immunized, and the number of students not fully immunized, by public health region during the 2021-2022 school year, Tennessee

Figure 5. Percentage of **public-school** students with a temporary/transfer immunization record, religious exemption, incomplete/missing record, or medical exemption, by public health region during the 2022-2023 school year, Tennessee.

County Level Summary

The percentage of public-school students who were fully immunized, by county, ranged from 80% (Moore County) to 99% (Houston County) (see **Figure 6**). Among private schools, the range was from 25.0% (Green County) to 100% (Marion, Loudon, Humphreys, Campbell, Bedford Counties) (see **Figure 7**). Note that the number of public and private schools within each county varies, and not all counties have private school survey responses. For a detailed breakdown of the number of public and private schools within each “percentage fully immunized” category, and the total number of students in each county, see **Table 1** in this report. In 2021-2022, 45% (43 of 95) of counties met the minimum for vaccine-preventable disease immunity of 95% coverage. In 2022-2023, we recorded a decline to 27% (26 of 95) of counties.

Figure 6. Percentage of 2022-2023 **Public and Private** school students fully immunized, by county, Tennessee.

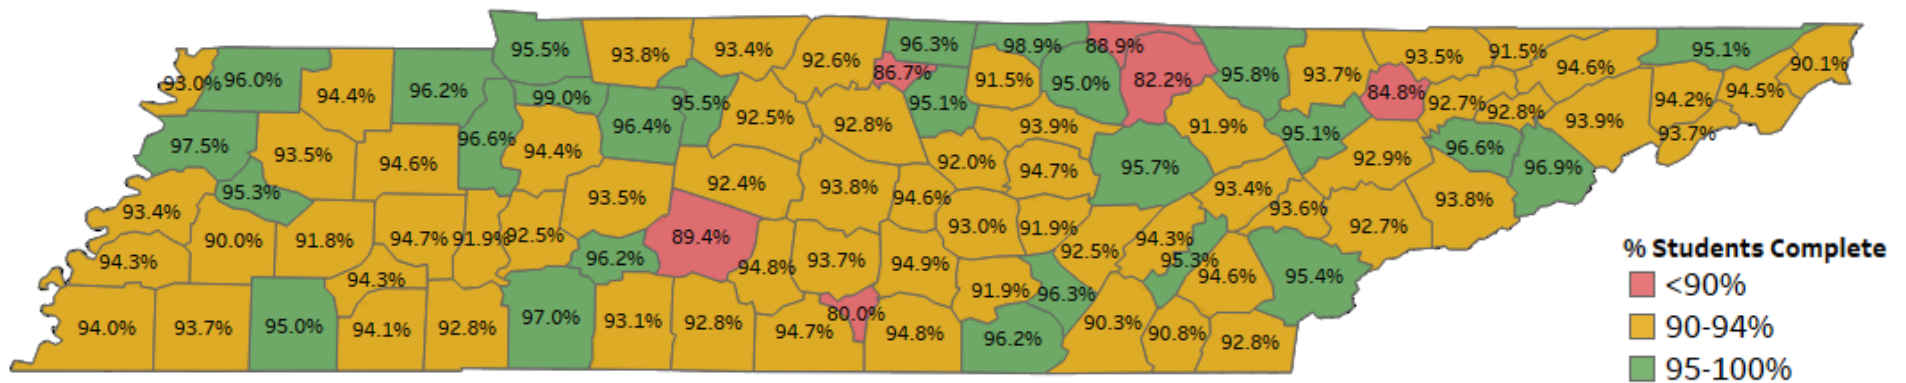

Figure 7. Percentage of **public-school** students fully immunized, by county, Tennessee.

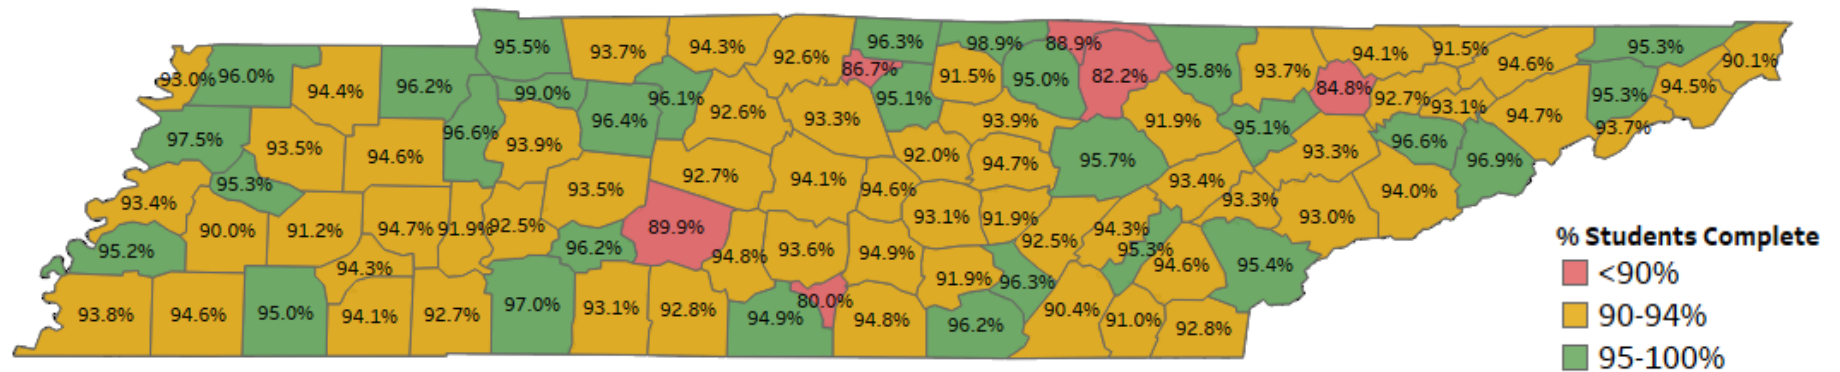

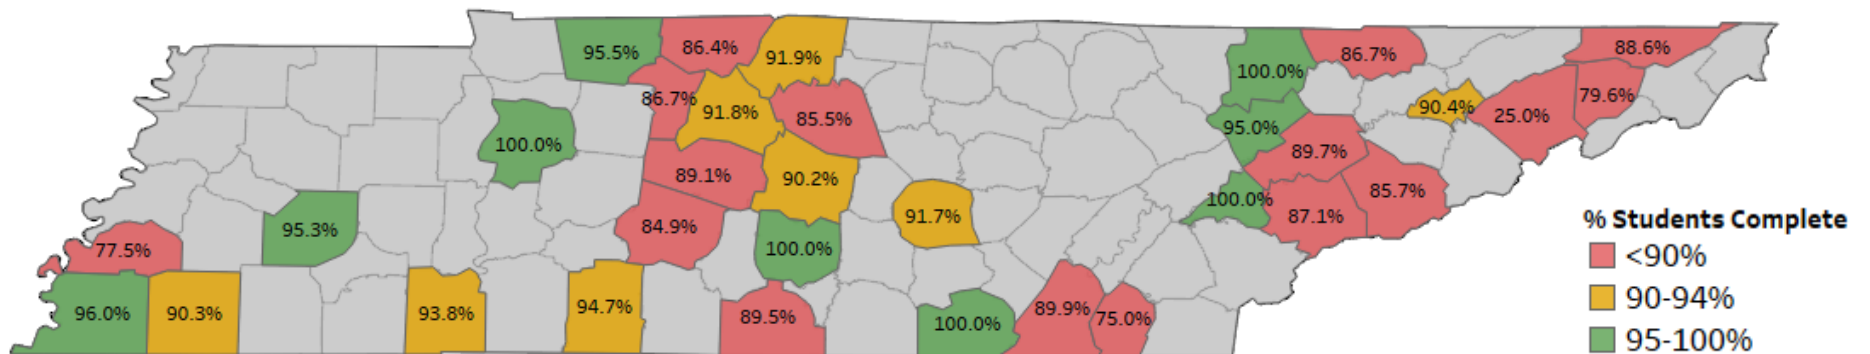

Figure 8. Percentage of **private-school** students fully immunized, by county, Tennessee.

(Note: 195 out of 268 private schools completed the 2022-2023 Kindergarten Assessment; this may influence the percentage of students fully immunized within each county)

High immunization coverage rates are critical to avoiding vaccine-preventable disease (VPD) outbreaks (e.g., measles, pertussis). A VPD outbreak may occur when the community or population is inadequately immunized. To remain at low risk for a VPD outbreak the immunization rate should remain at or above 95% to control highly infectious diseases such as measles [according to the CDC](#). In the maps above and tables below, we categorized an immunization rate of at least 95% as “meets immunization goal” (red), an immunization rate of 90% to 94.9% as “needs improvement” (yellow), and an immunization rate below 90% as “places the community at increased risk” (red).

For detailed Kindergarten Assessment results at the county, school districts, and school levels, please see the *Public-School Districts (SD) by County Summary* section below.

Public and Private School Summaries by County and School District

The following tables and graphs describe data: 1) at the county-level, featuring information for both public and private schools within the county; and 2) at the school district level, featuring information for all schools within the school district. Data are presented by county in alphabetical order, with school districts nested under each respective county in alphabetical order, and schools nested under each respective school district in alphabetical order.

Below are descriptions of each vaccine type shown in the county tables and graphs.

- Diphtheria-Tetanus-Pertussis vaccine (DTaP)⁸
- Hepatitis A Virus vaccine (HAV)⁹
- Poliomyelitis vaccine (IPV or OPV)
- Measles, Mumps, Rubella vaccine (MMR)
- Hepatitis B Virus vaccine (HBV)
- Varicella (chickenpox) vaccine (or credible history of disease)

Below are descriptions of each category shown in the county tables and graphs. All table percentages on a given row are the percentage of the “Total Students” number on that row.

County	Tennessee county name. School districts are grouped into their corresponding county.
School District	Department of Education school district name. Schools are grouped into their corresponding school district. Private schools are listed under a “private” district name within each county where applicable.
School Name	School name, listed alphabetically within each school district.
Total Students	Total number of enrolled kindergarten students at the time of immunization record assessment.
Fully Immunized	Number and percentage who meet state school entry requirements by being fully immunized.
Religious Exemption	Number and percentage with a valid religious exemption.
Medical Exemption	Number and percentage with a valid medical exemption to one or more vaccines.
Temporary Certificate	Number and percentage with a valid temporary certificate.
Excluded Transfer	Students exempt from assessment because records are unavailable due to a recent transfer from another TN school (within 30 days of the assessment). N/A for private schools based on data collection methods.

⁸ Diphtheria-Tetanus toxoid vaccine (DT), if medically indicated

⁹ <https://www.tn.gov/health/cedep/immunization-program/ip/immunization-requirements/childcare-12th-grade-immunization-requirements.html>

Incomplete Record	Number and percentage who do not meet requirements because they have an incomplete vaccination record.
Missing Record	Number and percentage who do not meet requirements because the school has no official immunization certificate on record.
